SUPERVISION and EXAMINATION SECTOR
Department of Rural Banks

Camels Rating System

September 1999
The supervisory processes of the Bangko Sentral over the banking system must continue to evolve and be responsive to the changing financial environment for such processes to be effective. It is in this context that the CAMEL Rating System being utilized as a supervisory tool was revised to address changes in the banking services industry and in supervisory policies and procedures. The revisions to the CAMEL Rating System include the addition of a sixth component \( S \) addressing sensitivity to market risks, the explicit reference to the quality of risk management processes in the management component, and the identification of risk elements within the composite and component rating descriptions. Hence, the rating system is referred to as the CAMELS Rating System.

The revisions are not intended to add to the regulatory burden of institutions nor require additional policies or processes. The revisions are intended to promote and complement efficient examination processes. The revisions have been made to update the rating system, while retaining the basic framework of the original rating system.

The System takes into consideration certain financial, managerial, and compliance factors that are common to all institutions. Under the System, SES endeavors to ensure that all financial institutions are evaluated in a comprehensive and uniform manner, and that supervisory attention is appropriately focused on the financial institutions exhibiting financial and operational weaknesses or adverse trends.

**OVERVIEW**

Under the System, each financial institution is assigned a composite rating based on an evaluation and rating of six (6) essential components of an institution's financial condition and operations. These component factors address the adequacy of Capital, the quality of Assets, the capability of Management, the quality and level of Earnings, the adequacy of Liquidity, and the Sensitivity to market risk. Evaluations of the components take into consideration the institution's size and sophistication, the nature and complexity of its activities, and its risk profile.

Composite and component ratings are assigned based on a 5 to 1 numerical scale. A 5 indicates the highest rating, strongest performance and risk management processes, and least degree of supervisory concern, while a 1 indicates the lowest rating, weakest performance, inadequate risk management practices and, therefore, the highest degree of supervisory concern.

The composite rating generally bears a close relationship to the component ratings assigned. However, the composite rating is not derived by computing an arithmetic average of the component ratings. Each component rating is based on a qualitative analysis, as well as quantitative assessment, whenever applicable, of the factors comprising that component and its interrelationship with the other components. When assigning a composite rating, some components may be given more weight than others depending on the situation at the institution. In general, assignment of a composite rating may incorporate any factor that bears significantly on the overall...
condition and soundness of the institution.

The ability of management to respond to changing circumstances and to address the risks that may arise from changing business conditions, or the initiation of new activities or products, is an important factor in evaluating an institution’s overall risk profile and the level of supervisory attention warranted. For this reason, the management component is given special consideration when assigning a composite rating.

The ability of management to identify, measure, monitor, and control the risks of its operations is also taken into account when assigning each composite rating. It is recognized, however, that appropriate management practices vary considerably among financial institutions, depending on their size, complexity, and risk profile. For less complex institutions engaged solely in traditional banking activities and whose directors and senior managers, in their respective roles, are actively involved in the oversight and management of day-to-day operations, relatively basic management systems and controls may be adequate. At more complex institutions, on the other hand, detailed and formal management systems and controls are needed to address their broader range of financial activities and to provide senior managers and directors, in their respective roles, with the information they need to monitor and direct day-to-day activities. All institutions are expected to properly manage their risks. For less complex institutions engaging in less sophisticated risk taking activities, detailed or highly formalized management systems and controls are not required to receive strong or satisfactory component or composite ratings.

**COMPOSITE RATINGS**

The rating scale ranges from 5 to 1, with a rating of 5 indicating: the strongest performance and risk management practices relative to the institution’s size, complexity, and risk profile; and the level of least supervisory concern. A 1 rating indicates: the most critically deficient level of performance; inadequate risk management practices relative to the institution’s size, complexity, and risk profile; and the greatest supervisory concern. The composite ratings are defined as follows:

**Composite 5**

Financial institutions in this group are sound in every respect and generally have components rated 4 or 5. Any weaknesses are minor and can be handled in a routine manner by the board of directors and management. These institutions are the most capable of withstanding the vagaries of business conditions and are resistant to outside influences such as economic instability in their trade area. These institutions are in substantial compliance with laws and regulations. As a result, these institutions exhibit the strongest performance and risk management practices relative to the institution’s size, complexity, and risk profile, and give no cause for supervisory concern.

**Composite 4**

Financial institutions in this group are fundamentally sound. For an institution to receive this rating, generally no component rating should be more severe than 3. Only moderate weaknesses are present and are well within the board of directors’ and management’s capabilities and willingness to correct. These institutions are stable and are capable of
withstanding business fluctuations. These institutions are in substantial compliance with
laws and regulations. Overall risk management practices are satisfactory relative to the
institution’s size, complexity, and risk profile. There are no material supervisory
concerns and, as a result, the supervisory response is informal and limited.

Composite 3

Financial institutions in this group exhibit some degree of supervisory concern in one or
more of the component areas. These institutions exhibit a combination of weaknesses
that may range from moderate to severe; however, the magnitude of the deficiencies
generally will not cause a component to be rated more severely than 2. Management
may lack the ability or willingness to effectively address weaknesses within appropriate
time frames. Institutions in this group generally are less capable of withstanding
business fluctuations and are more vulnerable to outside influences than those
institutions rated a composite 5 or 4. Additionally, these institutions may be in significant
noncompliance with laws and regulations. Risk management practices may be less than
satisfactory relative to the institution’s size, complexity, and risk profile. These
institutions require more than normal supervision, which may include formal or informal
enforcement actions. Failure appears unlikely, however, given the overall strength and
financial capacity of these institutions.

Composite 2

Financial institutions in this group generally exhibit unsafe and unsound practices or
conditions. There are serious financial or managerial deficiencies that result in
unsatisfactory performance. The problems range from severe to critically deficient. The
weaknesses and problems are not being satisfactorily addressed or resolved by the
board of directors and management. Financial institutions in this group generally are not
capable of withstanding business fluctuations. There may be significant noncompliance
with laws and regulations. Risk management practices are generally unacceptable
relative to the institution’s size, complexity, and risk profile. Close supervisory attention is
required, which means, in most cases, formal enforcement action is necessary to
address the problems. Institutions in this group pose a risk to the deposit insurance fund.
Failure is a distinct possibility if the problems and weaknesses are not satisfactorily
addressed and resolved.

Composite 1

Financial institutions in this group exhibit extremely unsafe and unsound practices or
conditions; exhibit a critically deficient performance; often contain inadequate risk
management practices relative to the institution’s size, complexity, and risk profile; and
are of the greatest supervisory concern. The volume and severity of problems are
beyond management’s ability or willingness to control or correct. Immediate outside
financial or other assistance is needed in order for the institution to be viable. Ongoing
supervisory attention is necessary. Institutions in this group pose a significant risk to the
deposit insurance fund and failure is highly probable.

COMPONENT RATINGS
Each of the component rating descriptions is divided into three sections: an
introductory paragraph; a list of the principal evaluation factors that relate to that
component; and, a brief description of each numerical rating for that component. Some
of the evaluation factors are reiterated under one or more of the other components to
reinforce the interrelationship between components. The listing of evaluation factors for
each component rating is in no particular order of importance.

**Capital Adequacy**

A financial institution is expected to maintain capital commensurate with the nature and
extent of risks to the institution and the ability of management to identify, measure,
monitor, and control these risks. The effect of credit, market, and other risks on the
institution’s financial condition should be considered when evaluating the adequacy of
capital. The types and quantity of risk inherent in an institution’s activities will determine
the extent to which it may be necessary to maintain capital at levels above required
minimums to properly reflect the potentially adverse consequences that these risks may
have on the institution’s capital.

The capital adequacy of an institution is based upon, but not limited to, an assessment of
the following evaluation factors:

* The level and quality of capital and the overall financial condition of the
  institution;
* The ability of management to address emerging needs for additional capital;
* The nature, trend, and volume of problem assets, and the adequacy of
  allowances for loan losses and other valuation reserves;
* Balance sheet composition, including the nature and amount of intangible
  assets, market risk, concentration risk, and risks associated with nontraditional
  activities;
* Risk exposure represented by off-balance sheet activities;
* The quality and strength of earnings, and the reasonableness of dividends;
* Prospects and plans for growth, as well as past experience in managing
  growth;
* Access to capital markets and other sources of capital, including support
  provided by parent company, if any.

**Ratings**

5  A rating of 5 indicates a strong capital level relative to the institution’s risk profile.

4  A rating of 4 indicates a satisfactory capital level relative to the institution’s risk
profile.

3  A rating of 3 indicates a less than satisfactory level of capital that does not
fully support the institution’s risk profile. The rating indicates a need for
improvement, even if the institution’s capital level exceeds minimum regulatory
and statutory requirements.

2  A rating of 2 indicates a deficient level of capital. In light of the institution’s risk
profile, viability of the institution may be threatened. Assistance from
shareholders or other external sources of financial support may be required.
A rating of 1 indicates a critically deficient level of capital such that the institution’s viability is threatened. Immediate assistance from shareholders or other external sources of financial support is required.

**ASSET QUALITY**

The asset quality rating reflects the quantity of existing and potential credit risk associated with the loan and investment portfolios, other real estate owned, and other assets, as well as off-balance sheet transactions. The ability of management to identify, measure, monitor, and control credit risk is also reflected here. The evaluation of asset quality should consider the adequacy of the allowance for loan losses and weigh the exposure to counterparty, issuer, or borrower default under actual or implied contractual agreements. All other risks that may affect the value or marketability of an institution’s assets, including but not limited to, operating, market, reputation, strategic, or compliance risks should also be considered.

The asset quality of a financial institution is rated based upon, but not limited to, an assessment of the following evaluation factors:

* The adequacy of underwriting standards, soundness of credit administration practices, and appropriateness of risk identification practices;
* The level, distribution, severity, and trend of problem, classified, nonaccrual, restructured, delinquent, and nonperforming assets for both on- and off-balance sheet transactions;
* The adequacy of the allowance for loan losses and other asset valuation reserves;
* The credit risk arising from or reduced by off-balance sheet transactions, such as unfunded commitments, credit derivatives, commercial and standby letters of credit, and lines of credit;
* The diversification and quality of the loan and investment portfolios;
* The extent of securities underwriting activities and exposure to counterparties in trading activities;
* The existence of asset concentrations;
* The adequacy of loan and investment policies, procedures, and practices;
* The ability of management to properly administer its assets, including the timely identification and collection of problem assets;
* The adequacy of internal controls and management information systems;
* The volume and nature of credit documentation exceptions.

**Ratings**

5 A rating of 5 indicates strong asset quality and credit administration practices. Identified weaknesses are minor in nature and risk exposure is modest in relation to capital protection and management’s abilities. Asset quality in such institutions is of minimal supervisory concern.

4 A rating of 4 indicates satisfactory asset quality and credit administration practices. The level and severity of classifications and other weaknesses warrant a limited level of supervisory attention. Risk exposure is commensurate with
capital protection and management’s abilities.

3  A rating of 3 is assigned when asset quality or credit administration practices are less than satisfactory. Trends may be stable or indicate deterioration in asset quality or an increase in risk exposure. The level and severity of classified assets, other weaknesses, and risks require an elevated level of supervisory concern. There is generally a need to improve credit administration and risk management practices.

2  A rating of 2 is assigned to financial institutions with deficient asset quality or credit administration practices. The levels of risk and problem assets are significant, inadequately controlled, and subject the institution to potential losses that, if left unchecked, may threaten its viability.

1  A rating of 1 represents critically deficient asset quality or credit administration practices that present an imminent threat to the institution’s viability.

MANAGEMENT

The capability of the board of directors and management, in their respective roles, to identify, measure, monitor, and control the risks of an institution’s activities and to ensure a financial institution’s safe, sound and efficient operation in compliance with applicable laws and regulations is reflected in this rating. Generally, directors need not be actively involved in day-to-day operations; however, they must provide clear guidance regarding acceptable risk exposure levels and ensure that appropriate policies, procedures, and practices have been established. Senior management is responsible for developing and implementing polices, procedures, and practices that translate the board’s goals, objectives, and risk limits into prudent operating standards.

Depending on the nature and scope of an institution’s activities, management practices may need to address some or all of the following risks: credit, market, operating or transaction, reputation, strategic, compliance, legal, liquidity, and other risks. Sound management practices are demonstrated by active oversight by the board of directors and management; competent personnel; adequate policies, processes, and controls taking into consideration the size and sophistication of the institution; maintenance of an appropriate audit program and internal control environment; and effective risk monitoring and management information systems. This rating should reflect the board’s and management’s ability as it applies to all aspects of banking operations as well as other financial service activities in which the institution is involved.

The capability and performance of management and the board of directors is rated based upon, but not limited to, an assessment of the following evaluation factors:

* The level and quality of oversight and support of all institution activities by the board of directors and management;
* The ability of the board of directors and management, in their respective roles, to plan for, and respond to, risks that may arise from changing business conditions or the initiation of new activities or products;
* The adequacy of, and conformance with, appropriate internal policies and controls addressing the operations and risks of significant activities;
* The accuracy, timeliness, and effectiveness of management information and risk monitoring systems appropriate for the institution’s size, complexity, and risk profile;
* The adequacy of audits and internal controls to: promote effective operations and reliable financial and regulatory reporting; safeguard assets and ensure compliance with laws, regulations, and internal policies;
* Compliance with laws and regulations;
* Responsiveness to recommendations from auditors and supervisory authorities;
* Management depth and succession;
* The extent that the board of directors and management is affected by, or susceptible to, dominant influence or concentration of authority;
* Reasonableness of compensation policies and avoidance of self-dealing;
* Demonstrated willingness to serve the legitimate banking needs of the community;
* The overall performance of the institution and its risk profile.

Ratings

5 A rating of 5 indicates strong performance by management and the board of directors and strong risk management practices relative to the institution’s size, complexity, and risk profile. All significant risks are consistently and effectively identified, measured, monitored, and controlled. Management and the board have demonstrated the ability to promptly and successfully address existing and potential problems and risks.

4 A rating of 4 indicates satisfactory management and board performance and risk management practices relative to the institution’s size, complexity, and risk profile. Minor weaknesses may exist, but are not material to the safety and soundness of the institution and are being addressed. In general, significant risks and problems are effectively identified, measured, monitored, and controlled.

3 A rating of 3 indicates management and board performance that need improvement or risk management practices that are less than satisfactory given the nature of the institution’s activities. The capabilities of management or the board of directors may be insufficient for the type, size, or condition of the institution. Problems and significant risks may be inadequately identified, measured, monitored, or controlled.

2 A rating of 2 indicates delicate management and board performance or risk management practices that are inadequate considering the nature of the institution’s activities. The level of problems and risk exposure is excessive. Problems and significant risks are inadequately identified, measured, monitored, or controlled and require immediate action by the board and management to preserve the soundness of the institution. Replacing or strengthening management or the board may be necessary.

1 A rating of 1 indicates critically deficient management and board performance or risk management practices. Management and the board of directors have not demonstrated the ability to correct problems and implement appropriate risk
management practices. Problems and significant risks are inadequately identified, measured, monitored, or controlled and now threaten the continued viability of the institution. Replacing or strengthening management or the board of directors is necessary.

EARNINGS

This rating reflects not only the quantity and trend of earnings, but also factors that may affect the sustainability or quality of earnings. The quantity as well as the quality of earnings can be affected by excessive or inadequately managed credit risk that may result in loan losses and require additions to the allowance for loan losses, or by high levels of market risk that may unduly expose an institution’s earnings to volatility in interest rates. The quality of earnings may also be diminished by undue reliance on extraordinary gains, nonrecurring events, or favorable tax effects. Future earnings may be adversely affected by an inability to forecast or control funding and operating expenses, improperly executed or ill-advised business strategies or poorly managed or uncontrolled exposure to other risks.

The rating of an institution’s earnings is based upon, but not limited to, an assessment of the following evaluation factors:

* The level of earnings, including trends and stability;
* The ability to provide for adequate capital through retained earnings;
* The quality and source of earnings;
* The level of expenses in relation to operations;
* The adequacy of the budgeting systems, forecasting processes, and management information systems in general;
* The adequacy of provisions to maintain the allowance for loan losses and other valuation reserves;
* The earnings exposure to market risk factors such as interest rate, foreign exchange, and price risks.

Ratings

5  A rating of 5 indicates earnings that are strong. Earnings are more than sufficient to support operations and maintain adequate capital and allowance levels after consideration is given to asset quality, growth, and other factors affecting the quality, quantity, and trend of earnings.

4  A rating of 4 indicates earnings that are satisfactory. Earnings are sufficient to support operations and maintain adequate capital and allowance levels after consideration is given to asset quality, growth, and other factors affecting the quality, quantity, and trend of earnings. Earnings that are relatively static, or even experiencing a slight decline, may receive a 4 rating provided the institution’s level of earnings is adequate in view of the assessment factors aforementioned.

3  A rating of 3 indicates earnings that need to be improved. Earnings may not fully support operations and provide for the accretion of capital and allowance levels in relation to the institution’s overall condition, growth, and other factors affecting the quality, quantity, and trend of earnings.
A rating of 2 indicates earnings that are deficient. Earnings are insufficient to support operations and maintain appropriate capital and allowance levels. Institutions so rated may be characterized by erratic fluctuations in net income or net interest margin, the development of significant negative trends, nominal or unsustainable earnings, intermittent losses, or a substantive drop in earnings from the previous years.

A rating of 1 indicates earnings that are critically deficient. A financial institution with earnings rated 1 is experiencing losses that represent a distinct threat to its viability through the erosion of capital.

LIQUIDITY

In evaluating the adequacy of a financial institution’s liquidity position, consideration should be given to the current level and prospective sources of liquidity compared to funding needs, as well as to the adequacy of funds management practices relative to the institution’s size, complexity, and risk profile. In general, funds management practices should ensure that an institution is able to maintain a level of liquidity sufficient to meet its financial obligations in a timely manner and to fulfill the legitimate banking needs of its community. Practices should reflect the ability of the institution to manage unplanned changes in funding sources, as well as react to changes in market conditions that affect the ability to quickly liquidate assets with minimal loss. In addition, funds management practices should ensure that liquidity is not maintained at a high cost, or through undue reliance on funding sources that may not be available in times of financial stress or adverse changes in market conditions.

Liquidity is rated based upon, but not limited to, an assessment of the following evaluation factors:

* The adequacy of liquidity sources compared to present and future needs and the ability of the institution to meet liquidity needs without adversely affecting its operations or condition;
* The availability of assets readily convertible to cash without undue loss;
* Access to money markets and other sources of funding;
* The level of diversification of funding sources, both on- and off-balance sheet;
* The degree of reliance on short-term, volatile sources of funds, including borrowings, to fund longer term assets;
* The ability to securitize and sell certain pools of assets;
* The capability of management to properly identify, measure, monitor and control the institution’s liquidity position, including the effectiveness of funds management strategies, liquidity policies, management information systems, and contingency funding plans.

Ratings

A rating of 5 indicates strong liquidity levels and well-developed funds management practices. The institution has reliable access to sufficient sources of funds on favorable terms to meet present and anticipated liquidity needs.
A rating of 4 indicates satisfactory liquidity levels and funds management practices. The institution has access to sufficient sources of funds on acceptable terms to meet present and anticipated liquidity needs. Modest weaknesses may be evident in funds management practices.

A rating of 3 indicates liquidity levels or funds management practices in need of improvement. Institutions rated 3 may lack ready access to funds on reasonable terms or may evidence significant weaknesses in funds management practices.

A rating of 2 indicates deficient liquidity levels or inadequate funds management practices. Institutions rated 2 may not have or be able to obtain a sufficient volume of funds on reasonable terms to meet liquidity needs.

A rating of 1 indicates liquidity levels or funds management practices so critically deficient that the continued viability of the institution is threatened. Institutions rated 1 require immediate external financial assistance to meet maturing obligations or other liquidity needs.

SENSITIVITY TO MARKET RISK

The sensitivity to market risk component reflects the degree to which changes in interest rates, foreign exchange rates, commodity prices, or equity prices can adversely affect a financial institution’s earnings or economic capital. When evaluating this component, consideration should be given to: management’s ability to identify, measure, monitor, and control market risk; the institution’s size; the nature and complexity of its activities; and the adequacy of its capital and earnings in relation to its level of market risk exposure.

For many institutions, the primary source of market risk arises from nontrading positions and their sensitivity to changes in interest rates. In some larger institutions, foreign operations can be a significant source of market risk. For some institutions, trading activities are a major source of market risk.

Market risk is rated based upon, but not limited to, an assessment of the following evaluation factors:

* The sensitivity of the financial institution’s earnings or the economic value of its capital to adverse changes in interest rates, foreign exchange rates, commodity prices, or equity prices;
* The ability of management to identify, measure, monitor, and control exposure to market risk given the institution’s size, complexity, and risk profile;
* The nature and complexity of interest rate risk exposure arising from nontrading positions;
* Where appropriate, the nature and complexity of market risk exposure arising from trading and foreign operations.

Ratings

A rating of 5 indicates that market risk sensitivity is well controlled and that there is minimal potential that the earnings performance or capital position will be
adversely affected. Risk management practices are strong for the size, sophistication, and market risk accepted by the institution. The level of earnings and capital provide substantial support for the degree of market risk taken by the institution.

4 A rating of 4 indicates that market risk sensitivity is adequately controlled and that there is only moderate potential that the earnings performance or capital position will be adversely affected. Risk management practices are satisfactory for the size, sophistication, and market risk accepted by the institution. The level of earnings and capital provide adequate support for the degree of market risk taken by the institution.

3 A rating of 3 indicates that control of market risk sensitivity needs improvement or that there is significant potential that the earnings performance or capital position will be adversely affected. Risk management practices need to be improved given the size, sophistication, and level of market risk accepted by the institution. The level of earnings and capital may not adequately support the degree or market risk taken by the institution.

2 A rating of 2 indicates that control of market risk sensitivity is unacceptable or that there is high potential that the earnings performance or capital position will be adversely affected. Risk management practices are deficient for the size, sophistication, and level of market risk accepted by the institution. The level of earnings and capital provide inadequate support for the degree of market risk taken by the institution.

1 A rating of 1 indicates that control of market risk sensitivity is unacceptable or that the level of market risk taken by the institution is an imminent threat to its viability. Risk management practices are wholly inadequate for the size, sophistication, and level of market risk accepted by the institution.
INSTRUCTIONAL GUIDELINES FOR THE CAMELS RATING SYSTEM:

These guidelines are intended to assist the examining Bank Officer in rating the financial institution. It must be emphasized, however, that while the quantitative aspect involves the computation of ratios, percentages and trends, the qualitative assessment depends largely on the Bank Officer’s understanding of the activities of the institution and his skills in analyzing and interpreting the various factors considered in assigning a rating.

The following points must be remembered:

1. No two institutions are alike. Each differs in size and sophistication, complexity of activities, and risk profile, all of which must be considered in analyzing responses to the questions, ratios and trends. The component factors may, therefore, have different weights when used in rating institutions. Thus, it is important that the Bank Officer possess a clear picture of the institution in these respects and exercise sound judgment in assigning weights to the components.

2. Rating components are interrelated. Some evaluation factors are considered in several components.

3. Analysis of ratios should focus on the factors which determine the ratios, rather than on the ratios themselves.

4. Other factors affecting significantly the overall condition of the institution may be incorporated in the evaluation. These include labor problems, local economic conditions and peace and order situation, and the like.

5. The procedures prescribed in these guidelines are not restrictive. The Bank Officer is given flexibility in utilizing other procedures in his evaluation and assessment.

6. Because of certain peculiarities in the different financial institutions and depending on the circumstances prevailing, some questions in the Questionnaires, as well as ratios for analysis, may not be applicable to the institution being rated. The Bank Officer is free to rephrase the questions or redefine the ratios to enhance his assessment.

7. Depending on the size of the institution, amounts may be shown in thousands, millions or billions with three (3) decimal places. The format should be consistent throughout the presentation in the Questionnaires and in the Ratio Analyses. Percentages should have one (1) decimal place only.

8. Unless otherwise indicated, the reference date for the required data is the current examination date and the period under review is reckoned from the immediately preceding examination date.

9. Component scores consist of the responses to the questionnaire (50%) and ratio analysis (50%), except in the case of Management the score of which is based solely on the questionnaire (100%).

Capital Adequacy (Annex A)
1. Determine compliance with regulatory capital (under Circular No. 156) and statutory
capital (under Section 22 of the General Banking Act).

2. Determine level and composition of capital. Common voting stock should comprise a
major component of capital.

3. Analyze capital in relation to volume and trend of classified/nonperforming assets.
Weak and/or deteriorating asset quality increases the institution’s need for capital. Consider also the adequacy of valuation reserves.

4. Analyze trend of capital over a three-year period. Assess capital growth with respect
to growth from the various sources of capital such as retained earnings, new capital
stock issue, capital injection by parent company, etc. Compare to growth in total
assets, other balance sheet categories and off-balance-sheet items.

   Balance sheet composition refers to changes in the make-up of the institution’s
assets and/or liabilities. An institution’s capital growth may keep pace with growth in
total assets; however, a change in asset composition, by decreasing relatively low-risk
assets (e.g. government securities) and increasing relatively high-risk assets (e.g.
unsecured loans), can increase the risk exposure of the institution and thereby
necessitate higher capital ratios. Likewise, a substantial shift in the composition of an
institution’s liabilities from stable core deposits to volatile short-term funding vehicles
increases the institution’s risk and necessitates higher capital ratios.

   Exposure to potential risk via growth in off-balance-sheet activities such as loan
or foreign exchange commitments or standby letters of credit, or an excessively
mismatched asset/liability structure, also increases the need for capital.

5. Consider growth experience and plans. Institutions with aggressive growth plans will
need to ensure that adequate capital is available to support planned growth.

**Asset Quality** (Annex B)

1. The analysis of asset quality should be forward-looking rather than backward-looking.
The Bank Officer should try to project the direction asset quality is moving.

2. Determine level, distribution, severity, and trend of non-performing/classified assets.
*(Level refers to total volume and amount in relation to capital. **Severity** refers to the
relative distribution of credits subject to classification among the especially mentioned,
substandard, doubtful, or loss classifications and the effect on the institution’s financial
condition. **Trend** refers to whether or not the overall asset quality has been improving
or deteriorating over time or since the previous examination. **Distribution** refers to
whether or not problem credits are concentrated in any particular type of loans,
industry, geographic area, etc.)*

3. Determine the adequacy of the valuation reserves set up by the institution. Compare
the booked reserves with the reserves recommended in the on-site examination and
check compliance with the general loan-loss provision required under Circular 164.

4. Assess the appropriateness/effectiveness of the methodology that management uses
to assess the adequacy of the loan loss reserves. Obtain a description, both written policies and practices, of the methodology.

5. Determine the quality and diversification of loan and investment portfolios, and total asset composition.

6. Assess the adequacy of the institution’s policies, procedures, and practices regarding its lending and investment activities. Evaluate the effectiveness of internal loan review.

7. Assess the adequacy of credit risk management taking into consideration the strategy, organization and staffing, policies, procedures and limits, risk monitoring and information system, and internal controls.

8. Assess credit-related off-balance sheet items/activities. Determine the risks inherent in the activity and the adequacy of management, monitoring and control. Consider volume in relation to total assets, capital or other appropriate balance sheet categories.

Management (Annex C)

1. Determine the adequacy of supervision by the board of directors, including its role in establishing policies, and its responsiveness to recommendations from auditors and supervisory authorities.

2. Assess the adequacy of the institution’s policies by reviewing the mechanism for formulating, approving, reviewing and updating policies; assess their appropriateness to particular operating functions; determine if the policies are in writing and properly communicated to all appropriate personnel; and determine if all policies are followed.

3. Determine the extent of management adherence to operating policies and procedures as established by the board of directors.

4. Determine the adequacy of the risk management system through the four (4) basic elements:
   a. active board and senior management oversight;
   b. adequate polices, procedures, and limits,
   c. adequate risk measurement, monitoring and management information systems, and
   d. comprehensive internal controls.

5. Determine the adequacy of the overall internal accounting control systems established by the institution and the audit function employed.

6. Establish the hierarchy of the institution by determining the functional responsibility levels of various officers and whether lines of authority are drawn in accordance with the organization chart.

7. Review plans (marketing, financial) of the institution.
Earnings (Annex D)

1. Assess the quality of earnings and fully understand the components of the institution’s earnings stream. The strength of the core earnings (exclusive of nonrecurring or extraordinary items) and consistency over time are of primary concern. Earnings are a major indicator of how well management is performing in a number of areas, such as pricing, generating new sources of revenue, and control of overhead and loan losses.

2. Analyze the strength and trend of the net interest margin from both the interest income and interest expense aspect, being aware of the relationship between earnings and liquidity and the implications of the institution’s funds management decisions, particularly as they relate to rate sensitivity.

3. Analyze components of noninterest income to identify any nonrecurring gains and fees.

4. Review components of noninterest expense for accuracy and propriety.

5. Review securities gains (or losses) in the context of the institution’s long-term investment goals.

6. Determine the effectiveness of budgeting, forecasting, and the management information system.

Liquidity (Annex E)

1. Determine the composition and stability of deposits. Assess any deposit concentration and determine what method the institution has developed to monitor customer concentration. Analyze significant changes in the deposit and/or liability mix.

2. Review borrowings since the previous examination, giving consideration to the frequency, duration and volume of borrowings and management’s reasons for borrowing.

3. Determine the adequacy of liquidity and funding policies and practices, including provisions for alternative sources of funds.

4. Determine the degree and trend of reliance on short-term, volatile sources of funds.

5. Evaluate the liquidity provided by securities and other assets. Identify assets which are readily convertible to cash without undue loss.

6. Assess (a) the overall interest-sensitivity of assets and liabilities to obtain insight into the level of interest rate risk exposure of the institution; (b) vulnerability of earnings to changes in interest rates; and (c) adequacy of policies and practices for monitoring and controlling overall balance sheet exposure to changes in interest rates. The GAP technique may be utilized in the sensitivity analysis.
Sensitivity to Market Risk  (Annex F)

1. Analyze the institution’s exposure to market risk arising from
   a. the overall structure of its balance sheet, with particular emphasis on
      * the investment portfolio
      * the nature of overall funding
      * the asset-liability mismatch of the balance sheet
   b. the use of off-balance sheet instruments
   c. trading activities

2. Consider the interest rate risk in the overall balance sheet as measured by gap, simulation, duration and/or other methods.

3. Determine the composition of the investment portfolio, such as the amount of traditional securities versus that of more market-sensitive securities.

4. Assess the degree of the portfolio’s sensitivity to movements in interest rates.

5. Evaluate the types of trading conducted, if any, along with the size, maturity, and complexity of positions taken.

6. Assess the quality of market risk management through the four (4) basic elements:
   a. active board and senior management oversight;
   b. adequate policies, procedures, and limits;
   c. adequate risk measurement, monitoring, and management information systems;
   d. comprehensive internal controls.

CAPITAL ADEQUACY

1. Has the institution developed methods and plans for maintaining adequate capital and correcting any deficiencies on capital requirements? 
   Yes  No

2. Do these plans
   a. ensure that the institution’s capital adequacy is monitored periodically in relation to present needs and risk characteristics and future asset growth plans and growth in off-balance-sheet activity? 
   Yes  No
   b. provide for adequate capital over time? 
   Yes  No

3. Has the institution complied with the
   a. regulatory capital/capital build-up program? 
   Yes  No
   b. statutory capital (Sec. 22 of RA 357)? 
   Yes  No

4. Is common voting stock a major component of capital? 
   Yes  No
   
   \[
   \text{\text{(voting stock) } P_{\text{voting stock}}/(\text{capital) } P_{\text{capital}} = \text{____%}}
   \]

5. Is capital on an upward trend? 
   Yes  No

Equivalent Score  
(50% of raw score)  

Add: Score of Ratio Analysis  

Total Score  

Weight of Component  
(State reasons below.)  

Equivalent Component Rating  

Notes:

a. Low-risk assets - assets whose potential for loss in value or earnings is minimal due to less vulnerability to market changes; unclassified loans (e.g. cash government securities; loans secured by government securities, etc.)

b. High-risk assets - rate sensitive assets with strong vulnerability to market changes and thus, greater potential for loss in value or earnings; classified/ non-performing assets; (repriceable loans, commercial papers, past due loans, unsecured loans, etc.)

c. Core deposits - stable deposits that are likely to remain with the bank regardless of market conditions (small savings deposits, long-term time deposits; demand deposits.)
d. Volatile funding sources - funding vehicles that react to market changes (interbank borrowings, commercial papers, etc).

e. A "no" answer requires further analysis to determine the impact on the institution's solvency and soundness
CAPITAL ADEQUACY - RATIO ANALYSIS

a. Adjusted networth to risk assets
   (Refer to CARE report.)

b. Networth-to-risk assets ratio to industry ratio

c. Classified loans to adjusted networth

d. Classified assets to adjusted networth and reserves

e. Loans to single borrower/family group to adjusted networth

f. Recommended valuation reserves to adjusted networth

g. Booked valuation reserves (loans) to total loans

h. Aggregate deposits and borrowings to adjusted networth

i. Borrowings to adjusted networth

Note:

a. A networth-to-risk-assets ratio below the statutory minimum requirement is equivalent to a score of “1” in this component.
b. Computation of Score:
   50% of Average of individual ratings  (Sum of ratings divided by number of items)

Score: Sum of ratings - _____ / 9 = _____(Average)

50% of Average = __________
ASSET QUALITY

Yes  No

1. Are the following loans and other risk assets on a downward trend -
   a. classified accounts? 
   b. nonperforming accounts?
   (Refer to item 6 of Annex A.)

2. Are growths in classified/nonperforming accounts coupled with parallel
growths in capital?
   (Refer to item 7 of Annex A.)

3. Is there no concentration of classified/nonperforming loan accounts in
   a particular
   a. type of loan?
   b. industry?
   c. geographic area?

4. Are there more accounts (in terms of amount) classified especially
   mentioned/substandard than doubtful/loss?

4. Are changes in the composition of the Board duly reported to and approved by BSP?
   — —

5. Is the Board actively involved in management?
   — —

6. Does the Board take immediate action on auditors'/BSP's findings?
   — —

Internal Administration

1. Does the institution have a full-time personnel manager?
   — —

2. Does the institution utilize written personnel manuals?
   — —

3. Does the institution utilize a system of written job descriptions, including descriptions for supervisory personnel?
   — —

4. Does the institution perform background investigation of new employees?
   — —

5. Does the institution have a formal training program?
   — —

6. Are staff meetings held on a regular basis? Frequency of meetings - — —

7. Is the system of communication within the institution effective?
   Yes No
8. Is there a policy on succession of management and replacement of key personnel?  

9. Does the institution forecast manpower requirements?  

10. Are qualified people advanced from within?  

11. Is management training given to those persons likely to assume higher level positions?  

12. Are salaries competitive?  

13. Are employee benefit programs competitive?  

14. Are there appropriate officer hiring policies to meet current and future needs?  

15. Do directors, officers and employees appear to work in harmony?  

**Management Supervision**  

1. Does management exhibit  
   a. technical competence?  
   b. leadership?  
   c. administrative ability?  

2. Does the hierarchy of the organization show functional responsibility levels of the various officers and lines of authority consistent with the organization chart?  
   (Attach organization chart.)  

3. Does the management structure  
   a. establish accountability?  
   b. allow for effective control and communication?  

4. Are there written policies and procedures covering all areas of management?  

5. Are these policies and procedures consistent with the objectives and direction set by the Board?  

6. Are these policies and procedures properly implemented?  

7. Are there no inconsistencies in these policies and procedures?  

8. Does management address problems promptly and take corrective action in problem areas?  

9. Does top management at least annually review lower management?  

   Yes    No
Frequency of review - _______________________

10. Does top management receive:
   a. a brief statement of condition daily? ____    ____
   b. a daily liquidity report? ____    ____
   c. a listing of assets subject to quality limitations at least monthly? ____    ____
   d. an earnings statement on a comparative basis at least monthly? ____    ____

Management Performance

A. Compliance with Laws and Regulations

1. Has the institution appointed a Compliance Officer (approved by BSP)? ____    ____

2. Is there a Compliance Program in place? ____    ____

3. Were there no violations of laws and regulations committed for which
   the institution/any director or officer was sanctioned? ____    ____
   If no, describe instances of violation and sanctions imposed.
   __________________________________________________________
   _________________________________________________________

4. Was there no supervisory action imposed on the institution? ____    ____
   If no, describe the supervisory action.
   __________________________________________________________
   _________________________________________________________

5. Has management satisfactorily explained/corrected all major violations
   and exceptions noted during previous on-site examinations? ____    ____
   If not, enumerate the findings still uncorrected.
   __________________________________________________________
   _________________________________________________________

6. Has management implemented/complied with BSP directives issued in
   connection with the off-site supervision of the institution? ____    ____

7. Are transactions involving DOSRI in compliance with applicable laws,
   rules and regulations? ____    ____

8. Are interlocking directorships/officerships duly approved by BSP? ____    ____

9. Are there no violations noted in the current examination for which
   sanctions may be recommended? ____    ____
   Yes    No

B. Overall Condition of the Institution
1. Has the institution been operating profitably during the past three (3) years?

<table>
<thead>
<tr>
<th>Year-</th>
<th>19__</th>
<th>19__</th>
<th>19__</th>
</tr>
</thead>
<tbody>
<tr>

</table>

2. Is net income on an upward trend?

3. Is the institution adequately capitalized?
   Component rating of Capital Adequacy - _______

4. Is the liquidity position satisfactory?
   Component rating of Liquidity - _______

5. Are nonperforming assets within reasonable levels?
   (Refer to item 1.b of Annex B.)

6. Is the overall risk exposure of the institution low/moderate?
   (Refer to the Institution Risk Profile.)

C. Plans and Projections

1. Does the institution have
   a. financial plans?
   b. marketing plans?

2. Does the institution prepare or utilize a long-range forecast of economic conditions in drawing its plans?

3. Does the institution employ a marketing manager and/or outside marketing consultant?

4. Does management review performance vis-a-vis projections?
   Frequency of review - ___________

Risk Management System

A. Board and senior management oversight

1. Does the Board have a clear understanding and working knowledge of the risks to which the institution is exposed?

2. Has the Board approved policies to limit those risks?

3. Does the Board periodically review risk exposure limits to conform with changes in strategies and in market conditions?
   Frequency of review - ___________
4. Does management ensure that its lines of business are managed and staffed by personnel with knowledge, experience, and expertise consistent with the nature and scope of the institution’s activities?  

5. Does management ensure that the depth of staff resources is sufficient to operate and manage soundly the institution’s activities and that its employees have the integrity, ethical values, and competence that are consistent with a prudent management philosophy and operating style?  

6. Does management provide adequate supervision of the day-to-day activities of officers and employees?  

7. Does management implement the procedures and controls necessary to comply with adopted policies?  

8. Is management able to respond to risks that may arise from changes in the competitive environment or from innovations in markets in which the institution is active?  

9. Is there an independent Risk Management Unit tasked with the responsibility of identifying, measuring, monitoring, and controlling risks?  

B. Policies, Procedures and Limits  

1. Do the policies, procedures, and limits provide for adequate identification, measurement, monitoring, and control of the risks posed by the lending, investing, trading, trust, fiduciary and other significant activities of the institution?  

2. Are the policies, procedures, and limits consistent with management’s experience level, the institution’s stated goals and objectives, and the overall financial strength of the organization?  

3. Do the policies clearly delineate accountability and lines of authority across the institution’s activities?  

4. Do the policies provide for the review of activities new to the institution to ensure that the infrastructures necessary to identify, monitor, and control risks associated with an activity are in place before the activity is initiated?  

C. Risk Monitoring and Management Information Systems  

1. Do the risk monitoring practices and reports address all the material risks?
2. Are the key assumptions, data sources, and procedures used in measuring and monitoring risk appropriate and adequately documented and tested for reliability on an on-going basis? 

3. Are reports and other forms of communication
   a. consistent with the institution’s activities? 
   b. structured to monitor exposures and compliance with established limits, goals, or objectives? 

4. Do reports compare actual versus expected performance? 

5. Are reports accurate and timely? 

6. Do reports to management/directors contain sufficient information for decision-makers to identify any adverse trends and to evaluate adequately the level of risk faced by the institution? 

D. Internal Controls

1. Is the system of internal controls appropriate to the type and level of risks posed by the nature and scope of the organization’s activities? 

2. Does the organizational structure establish clear lines of authority and responsibility for monitoring adherence to policies, procedures, and limits? 

3. Do reporting lines provide sufficient independence of the control areas from the business lines and adequate separation of duties throughout the organization? 

4. Do official organizational structures reflect actual operating practices? 

5. Are financial, operational, and regulatory reports
   a. reliable? 
   b. accurate? 
   c. timely 

6. Are exceptions noted and promptly investigated? 

7. Are there adequate procedures for ensuring compliance with applicable laws and regulations? 

8. Do internal audits or other control review practices provide for independence and objectivity? 

9. Are internal controls and information systems adequately tested and reviewed? 

Yes  No
10. Are the coverage, procedures, findings, and responses to audits and review tests adequately documented?  

11. Are identified material weaknesses given appropriate and timely high level attention?  

12. Are management’s actions to address material weaknesses objectively verified and reviewed?  

13. Does the institution’s audit committee or board of directors review the effectiveness of internal audits and other control review activities on a regular basis?  
   Frequency of review - _______________________.  

**Derivatives Activities**  

1. Are the Risk Management Guidelines for Derivatives prescribed under Circular 102 complied with?  

   If no, describe the areas of non-compliance  
   ___________________________________________________________________  
   ___________________________________________________________________.

b. Net operating income (after tax) is net income before extraordinary items.
LIQUIDITY

1. Is there a board policy that defines the liquidity profile of the institution?  ___  ___
2. Is this policy supported by guidelines, limits, and procedures for management to follow?  ___  ___
3. Are there reports or controls provided to monitor compliance with these guidelines, limits, and procedures?  ___  ___
4. Are there tools used to measure liquidity?
   (Describe the tools used to measure liquidity.)  ___  ___
5. Are the liquidity measurement tools
   a. adequate?  ___  ___
   b. timely?  ___  ___
6. Do they address the
   a. board's policy?  ___  ___
   b. cash flow liquidity?  ___  ___
   c. diversification of funding and concentration guidelines?  ___  ___
7. Is there a contingency funding plan approved by the board?  ___  ___
8. Is the contingency funding plan well-developed and effective?  ___  ___
9. Are there no asset/liability mismatches as to:
   a. rate?  ___  ___
   b. maturity?
      (Refer to item 12 of Annex A.)  ___  ___
10. Does the balance sheet show adequate liquefiable assets?  ___  ___
